

TENDER SPECIFICATION SHEET

Friiva™ gate & fence flood protection barrier

Applications:

Protecting valuable assets and people

The Friiva™ Gate & Fence Flood protection barrier has many applications in flood protection response and can be used by business owners and individuals. The barrier is easy to handle and requires no special skills or equipment. The Friiva™ Gate & Fence Flood protection barrier has many applications and can be used door gate barrier in buildings and fence barrier around property as well as permanent installed around equipment and utilities as it is easy to remove for maintenance

The Friiva™ gate & fence flood protection barrier

Fast and easy deployable aluminum flood protection barrier for fences, gates and doors

Friiva Gate and Fence barriers is a unique modular system made from aluminum. The system is versatile and can be customized to most height and length requirements to protect building or areas as required.

The barrier panels and posts are constructed in durable aluminum alloy. The aluminum barrier panels provide flood protection in vertical increments of 200 mm logs/planks.

The barrier panels stack on top of one another and most applications can be installed by one person.

The Cold Flood Prevention barrier can be used to control and protect against rising water levels in exposed areas such as housing, commercial buildings, infrastructure, and airports etc.
